

# Publish Data to IBM Cloud

|                |   |
|----------------|---|
| <b>Title</b>   | <b>Smart waste management for metropolitan cities</b> |
| <b>Team id</b> | <b>PNT2022TMID34106</b>                               |

Step 1: In the python script give the IBM credentials like org id, device type, etc. to connect to IBM cloud

Step2: Open your cloud account and open Watson platform

Step 3: In the specified Device Type mentioned in python script shows connected

Step 4: Then click on Recent Events and observe the Output data

## output:

The screenshot displays the IBM Watson IoT Platform interface. At the top, there's a navigation bar with 'Browse', 'Action', 'Device Types', and 'Interfaces'. Below this, a table lists devices. One device is highlighted, and its 'Recent Events' tab is selected, showing a stream of data events.

| Event   | Value                 | Format | Last Received     |
|---------|-----------------------|--------|-------------------|
| event_1 | {"dist":91,"load":95} | json   | a few seconds ago |
| event_1 | {"dist":53,"load":40} | json   | a few seconds ago |
| event_1 | {"dist":7,"load":26}  | json   | a few seconds ago |
| event_1 | {"dist":48,"load":99} | json   | a few seconds ago |
| event_1 | {"dist":68,"load":50} | json   | a few seconds ago |

1 Simulation running
